

Pepperdine Wireless Network

Overview

Pepperdine University has wired and wireless networking capabilities in most areas of all its Southern California campuses. The wireless network provides the features and benefits of a traditional network without the limitations of wires or cables. It gives students the freedom to move around the campus while maintaining an active Internet connection. Students can conduct research, download homework, and check email whenever they are in a wireless location.

Access - Get Connected

The Pepperdine Wireless Network is accessed using a Pepperdine NetworkID and password. To learn how to register your computer for access to the wireless network, go to: [Network and Internet Access](#).

Rules of Wireless

Wireless Printers and Personal Access Points are Prohibited

Wireless printers, personal wireless access points, and wired or wireless routers are prohibited at all campuses and student residences (Seaver and Drescher student residences and the Page Apartments) with wireless coverage.

The presence of these devices interfere with the Pepperdine wireless signal. Extending Pepperdine networks to unregistered clients reduces security of the network. Routers also lead to service outages when misconfigured. When discovered, these devices will be shut down.

Abide by the Network Responsible Usage Policy

In order to access the Pepperdine wireless network, all users must agree to the Computer and Network Responsible Usage Policy, found at <https://community.pepperdine.edu/it/security/policies/usagepolicy.htm>. Devices found in violation of policy and subject to disconnect with communication and any possible remediateion to follow disconnect.

Note to merchants and vendors: As an academic and guest friendly network, Pepperdine Wi-Fi does not comply with the strict standards for all connected devices and the requirement to be separate from non-payment card networks found in the Payment Card Industry Data Security Standards (PCI DSS). As such you violate your merchant agreement and the Computer and Network Responsible Usage Policy by taking customer payments with devices connected to our network. Use a cellular data network instead. Pepperdine departments must [document and use procedures and solutions](#) approved by the Pepperdine Finance office.

FAQ

- ✓ **What should I do if my Wi-Fi connection in the dorm is unstable?**
- ✓ **When I try to connect to the Pepperdine Wi-Fi, I see an error message that reads “This device has been blocked due to Malware.” What should I do?**
